

RE-TECK

Market Radar

Daily Market Intelligence Report

Report date: 2026-06-11

Window: Past 7 days (week of June 4-11, 2026)

Data Centers • IT Hardware OEM • IT Leasing • Telecom OEM • Telecom Carriers

At a glance

Strong GPU infrastructure buildout: CoreWeave completes Vera Rubin NVL72 validation (June 2026); Elea secures landmark Petrobras \$500M contract and \$1B São Paulo expansion; TIM Brazil swap 6,500 4G/5G sites. AI PC launches (Dell, HP, Nvidia RTX Spark) signal refresh cycles ahead.

ITAD Data Centers

Company / News	Key points	Re-Teck angle
North America		
AWS Saudi Arabia region + AI Zone with 150,000 AI chips Saudi Arabia, Chile	• 150k AI chip capacity in new Saudi Arabia AI Zone • \$5.3B Saudi region investment; Chile region ~\$4B by EOY • Hyperscaler expansion signals future GPU decommissioning in 2028–2030	<i>Massive new GPU deployments in Saudi Arabia and Chile → large future decommissioning and refurbishment opportunity as hardware refreshes 3–5 years post-install.</i>
Microsoft Azure \$7B Fairwater project in Wisconsin Wisconsin, USA	• \$7B capital commitment (Fairwater, Wisconsin) • Part of Azure's 400+ global data center portfolio • AI/ML workload growth driving refresh cycles	<i>Large capital deployment in North America → future server, GPU, and storage decommissioning as capex matures into refresh phases.</i>
CoreWeave + NVIDIA Vera Rubin NVL72 validated on CoreWeave Cloud (June 2026) North America (CoreWeave)	• Vera Rubin NVL72 successfully deployed and validated (June 2026) • 5+ GW AI factory buildout planned by 2030 • CoreWeave: 850 MW active, 100k+ GPUs across 43 data centers (2025)	<i>Neocloud GPU buildout (CoreWeave 5+ GW by 2030) → rapid fleet turnover with 28–35% annual refresh = high-volume GPU and memory recovery feedstock.</i>
Latin America · Brazil		
Elea Digital Petrobras \$500M contract + \$1B São Paulo expansion São Paulo, Brazil	• Petrobras contract: US\$500M (largest Latin America IT infrastructure project) • \$1B São Paulo expansion; ~120MW capacity over 3–5 years • I Squared Capital ownership; Rio AI City 3GW project advancing	<i>Elea's tripled data center footprint in Brazil → future decommissioning of legacy Petrobras and corporate IT assets + large GPU/server refresh cycles as new facilities mature.</i>
Ascenty New data center SPO05 in São Paulo (47 MW campus) São Paulo, Brazil	• SPO05 new DC in São Paulo Metro area • ~R\$300M investment; 47 MW total São Paulo campus • Aligns with Brazil's digital transformation & cloud adoption	<i>Ascenty's São Paulo expansion mirrors Elea's strategy → increased competition for customer IT asset disposition and data center equipment refurbishment.</i>

ITAD OEM

Company / News	Key points	Re-Teck angle
North America		
Nvidia / Dell / HP / Lenovo / ASUS / MSI Nvidia RTX Spark AI PC launch (Computex June 2026) North America (global launch)	• RTX Spark (Arm-based) launched on laptops from 6 OEMs (June 2026) • Dell, HP, ASUS, Lenovo, MSI AI PC models in market • Enterprise AI PC refresh wave expected over next 2–3 years	<i>New AI PC generation launched → enterprise PC refresh cycles begin in 2026–2027, driving trade-in/take-back programs and refurbishment demand for 3–5 year old laptops and desktops.</i>
Dell / HPE / Lenovo / Supermicro AMD MI325X GPU servers (PowerEdge XE7745, others) North America	• Dell PowerEdge XE7745: up to 16 single-width MI325X GPUs / 4U • AMD MI325X + 5th Gen Epyc platform • High-density GPU servers for enterprise AI inferencing	<i>New GPU server generation (MI325X) deployed in enterprises → existing H100/A100 servers retire, increasing secondary-market GPU and memory recovery feedstock for Re-Teck.</i>

ITAD Leasing Companies

Company / News	Key points	Re-Teck angle
North America		
Market (HaaS/Leasing sector) Hardware as a Service market grows 23.7% CAGR (2025–2026) Global (North America primary driver)	• HaaS market \$127.5B → \$157.7B (2025→2026) • 23.7% CAGR reflects strong OpEx-based IT acquisition trend • Enterprise AI infrastructure & device refresh drive growth	<i>Rapid HaaS adoption → end-of-lease returns increasing 25%+ annually; major sourcing opportunity for Re-Teck to aggregate and disposition enterprise IT assets at volume.</i>
CHG-MERIDIAN CHG-MERIDIAN manages \$13B IT assets under management Global (North America, EMEA, APAC)	• \$13B AUM (as of 2024) • Global leasing & lifecycle management leader • Fleet refresh cycles every 3 years for enterprise customers	<i>CHG-MERIDIAN's \$13B AUM represents massive pipeline of end-of-lease IT returns; Re-Teck can position as downstream asset recovery and disposition partner for leasing companies.</i>

Telecom OEM

Company / News	Key points	Re-Teck angle
North America		
Ericsson / Nokia / Samsung Open RAN deployments accelerate (AT&T 70% target by end 2026) North America (AT&T network)	• AT&T \$14B Open RAN deal (Ericsson); 50% traffic live, 70% target EOY 2026 • First O-RAN calls w/ third-party radios (1Finity/Fujitsu) successful in live networks • 5G RAN market projected \$31.7B by 2033 (7.8% CAGR)	<i>AT&T's 70% Open RAN migration → mass swap of legacy (closed RAN) telecom equipment; Ericsson/Nokia/Samsung depreciate older RAN gear, creating refurbishment & recycling volume.</i>

EMEA		
Vodafone (Europe) 2,500 UK Open RAN sites by 2027 (Samsung, NEC, Wind River) UK, Germany (Europe)	• 2,500 UK sites by 2027 (Samsung, NEC, Wind River) • Open RAN live in UK and Romania (production deployments) • Germany: additional thousands of Samsung Open RAN sites	<i>Vodafone's 2,500+ site rollout in UK + Germany → decommissioning of legacy Ericsson/Nokia/Huawei RAN equipment; secondary market for refurbished telecom gear.</i>
APAC + Oceania		
No relevant news in this window.		

Telecom Carriers

Company / News	Key points	Re-Teck angle
North America		
AT&T 50% network traffic on open-capable platforms (Target: 70% by EOY 2026) North America (USA)	• 50% traffic on open platforms (as of early 2026) • 70% target by end of 2026 • First live O-RAN calls with third-party radios successful	<i>AT&T's rapid Open RAN migration → accelerated depreciation of legacy proprietary RAN equipment; surplus telecom hardware enters secondary markets for refurbishment and material recovery.</i>
Latin America · Brazil		
TIM 6,500 4G/5G site swap across 15 state capitals (38% coverage gain) Brazil (15 state capitals & metro areas)	• 6,500 4G/5G site swap through 2027 • 680 sites already modernized in Belo Horizonte (1M+ users) • 38% 5G coverage increase; 40% capacity improvement planned	<i>TIM's nationwide 6,500-site modernization → large volume of decommissioned 4G/5G telecom equipment (antennas, baseband, RRU) available for refurbishment and material recovery.</i>
